

**Release Notes for PGM Anywhere**  
**Release Date: 5/16/2018**

## **Enhancements**

### **New ACGA rates**

On May 15, 2018, the American Council on Gift Annuities (ACGA) announced new suggested maximum gift annuity rates to replace the rates that became effective on January 1, 2012. The rates will apply to gift annuities established on or after July 1, 2018, although a charity may follow the new rates immediately if it wishes.

For typical annuitant ages, 70 – 85, the new single-life rates will be 0.4% - 0.5% higher than the rates they replace. Two-life annuity rates at these same ages are 0.4% - 0.6% higher than the rates they replace. In addition, the ACGA has increased the compound interest factor for deferred gift annuity (DGA) rates from 3.25% to 3.75% for all deferral periods. As a result of this increase, the longer the deferral period, the greater will be the difference between the old DGA rates and the new ones. For more details, see our analysis at <https://info.pgcalc.com/acga-rate-analysis-2018>.

PGM Anywhere will continue to pick gift annuity rates from your current gift annuity rate table for gift dates prior to July 1, 2018. If you wish to use the new rates at any time prior to July 1, 2018, open Customize – Calculation Options and select "ACGA Rates Effective 7/1/2018" as the "Gift annuity rate table," then click Done.

If you have a specific ACGA rate table or custom rate table selected, PGM Anywhere will continue to use that rate table indefinitely. To start using the new ACGA rate table for gift dates after June 30, 2018 instead, open Customize – Calculation Options and select "ACGA Rates Effective on Date of Gift" as the "Gift annuity rate table," then click Done.

Note that if your organization has ACGA rates on file with one or more regulating states, you will NOT need to file the new ACGA rates with those states before you offer them starting on July 1, 2018. However, if your organization has non-ACGA rates on file with these states and it plans to start offering the ACGA rates, or vice versa, you WILL need to file the new rates with those states before you start offering them.

### **IRS discount rates updated through May 2018**

As with every update, we have included all monthly IRS discount rates up to the month of release to ensure their accuracy. PGM 7.5A incorporates discount rates through May 2018.

### **Online Help updated to reflect all changes**

We have updated PGM's Online Help to reflect all changes in PGM 7.5A.

## **Known Issues**

### **Deduction wrong for grantor lead trusts funded with short term gain or ordinary income property**

The charitable deduction computed for a grantor lead trust funded with short term gain or ordinary income property is based on the value of the property transferred rather than the donor's cost basis in the property. This set of facts is highly unlikely to arise in practice, but we will fix this issue in the next release.

### **Age Differences on *PGMA Release 5A Presentations* vs. *PGM 7.5A Presentations***

On several presentations for deferred gift annuities (DGAs) and a few for flexible gift annuities (FGAs), *PGMA Release 5A* shows the age of the annuitant as of the annuity starting date whereas *PGM 7.5A* shows the age of the annuitant as of the date of first payment. For example, when a DGA is shown on the Comparison of Benefits chart in *PGM Anywhere*, the age shown in the DGA column heading is based on the annuity starting date, but in *PGM 7.5A* it is based on the date of first payment. We expect to resolve this discrepancy between the two products in future releases.

### **<BEQUESTORNAME> is not replaced when narrative includes sample bequest language**

You can set up sample bequest language under Customize > Organizations > Bequests. If you include "<BEQUESTORNAME>" in your sample language, your entry for "Identify organization in bequest language as" is supposed to replace "<BEQUESTORNAME>" when the sample bequest language appears in a narrative. Instead, "<BEQUESTORNAME>" appears.

To resolve this issue in Release 5A, go to Customize > Organizations > Bequests and replace all occurrences of "<BEQUESTORNAME>" with the organization name as you want it to appear in sample bequest language.

### **"Font is not available. Select another font from the list"**

This message appears when you attempt to select a different font (while viewing Results) if the requested font is not resident on the device on which you are running *PGM Anywhere*.

In Firefox on a Samsung Galaxy (an Android-based tablet), this message appears anytime you attempt to change the font, regardless of whether the font is resident on your device. In this case, try changing the font while running *PGM Anywhere* in a different browser or on a different device.

### **Field value doesn't highlight when tapped on an iPad**

This is standard browser behavior on the iPad. There is an expectation that tapping a field will highlight the entire field in future versions of Chrome and Safari.

### **User must click Done twice to make action occur**

In Firefox only, there are some actions that can be completed only when you tap twice in a row rather than the usual once. The solution is either to tap twice in these situations or to run *PGM Anywhere* in a different browser. Instances where this happens include:

- If you edit a Gift Annuity or Deferred Gift Annuity gift option, typing in new date of first payment for GA or DGA under Gift Options requires clicking Done twice.
- When you edit or add a Pooled Fund or Disclaimer under Customize and click Done
- When you change the gift date or birth dates in the Date - Lives – Term window and then click another item in the left navigation bar, such as Results, you have to click twice in the left navigation bar to move on. This behavior occurs when you type your date change into the field, but not if you use the calendar control to revise the date.

### **Disclaimer text is cut off on the right**

Disclaimer text can get cut off on the right when the font is too big. Try reducing the font size. Choosing a different font without changing the size might also help.

**Calendar control does not display numbers for the days**

We have seen this behavior on one machine when running *PGM Anywhere* in Internet Explorer 9. Try running *PGM Anywhere* in a later version of Internet Explorer or a different browser.

**Results doesn't work on iPad 1**

We have found that *PGM Anywhere* hangs up indefinitely when you run it on an iPad 1 (the original iPad) and tap Results. Try running *PGM Anywhere* on a different device: a later version of the iPad, on an Android-based tablet, or in a laptop or desktop browser.

**iPad sometimes doesn't display second age in Date-Lives-Term window**

If you are working on an iPad and enter a second age or birth date in the Date-Lives-Term window, open a different window (tap Results, for example), then open Date-Lives-Term again, the second age/birth date is not visible. If you then tap Results, the second age will still appear on the chart and the calculations will be based on two ages.

In the case of entering birth dates, the second birth date disappears as described only if you type in the complete birth date. If you use the date control to enter the birth date or enter the birth date in mm/dd/yy format rather than mm/dd/yyyy format, the date will not disappear when you leave and then return to the Date - Lives- Term window.

**Printing requires PDF download on some browsers**

When you choose print in the Results screen, a PDF should open in your browser window and the print dialog should appear. In some browsers, such as FireFox in our testing, the browser instead treats the PDF file as a download. In order to finish sending the print job to the printer in this situation, you will need to go to the downloads screen in your browser and open the file, at which point the print dialog should appear.
